

CABLING

A solid network cabling system is the most essential ingredient in a seamless network environment.

Livewire Information Systems is a licensed C-7 Contractor with years of experience providing expert cabling services for data, fiber, voice, video and multi media solutions.

Our qualified team can design and implement a new network or assist you in expanding or upgrading your existing one. Our network architects can create a solution to provide your business with an affordable and effective cabling solution.

We provide expert data cabling services using Cat 3 (Voice), Cat 5e/6 (Data or Voice), phone blocks, racks, patch panels and cable management systems. We provide all cabling services required to support VoIP telephony solutions as well as computer networks. We are also skilled in the installation of both single and multimode fiber optic cabling, video surveillance and access control cabling. We test and certify all of our work and back it up with a 1 year warranty.

Cabling Project Management

Our comprehensive site survey enables us to create plans and a design for your installation. It also allows us to better estimate the costs involved and give you a more detailed estimate of what your final out of pocket expense will be. Cabling is carefully performed by our technicians according to our plan and design. With adherence to proper installation methods and testing procedures we ensure that your data cabling will run with the utmost efficiency.

Cabling Solutions

Livewire is a proud provider of product from Belden, Commscope, Chatsworth, Panduit, Leviton, ICC, Bogen, Valcom and Aiphone. Our expert technicians are certified in the installation of Corning Fiber Optic Solutions.
